Dr. Raymond Hurst’s
The 5 E Model:
Engage, Explore, Explain, Elaborate, Evaluate

The 5 E model of inquiry based instruction is a constructivist, approach to learning:

- The first “E”, ENGAGE, is about involving the learners in something they are interested in.
- The 2nd “E”, EXPLORE, is where students interact with the scientific phenomena directly.
- Following this hands on experience, students EXPLAIN what they discovered during the EXPLORE phase.
- The 4th “E” is ELABORATE, where learners apply the new information to other areas of their lives.
- The final “E” is EVALUATE, where learners self-reflect on the process and the new knowledge gained.

When: February 6, 2009
Time: 10am -12pm
Where: RCC Moreno Valley Campus PSC 11

R.S.V.P’s are greatly appreciated! Please RSVP to Julie Ruiz
